DETAILED ACTION

1. Upon review of applicant's response/amendment dated 11/20/2006, it is noted that a restriction/election is warranted. Any inconvenience to applicant is regretted.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-15, 19, and 21, drawn to a combination, classified in class 701, subclass 301.

II. Claim 22, drawn to a process, classified in class 180, subclass 271.

3. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice a process of controlling the stability of a vehicle when the vehicle changes lanes.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art shown by their different classification, restriction for examination purpose as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
